Portfolio: <https://braylonwatson.github.io/Portfolio-Profile/>

Professional Summary

Computer Science student and Division I student-athlete experienced in AI systems, database-backed applications, and full-stack development. Strong collaborator who is eager to learn.

Technical Skills

- **Languages:** C++, Java, Python, JavaScript, SQL
- **Frameworks/Tools:** PostgreSQL, React, Supabase, Vercel, Git, Linux, Conda
- **Concepts:** Algorithms, Data Structures, CNNs, Computer Vision, ML, Client-Server Systems

Projects

- **CoordinAlte – Football AI Assistant:** Developed machine learning system using XGBoost to predict offensive play type and generate defensive recommendations from historical play-by-play data. Built backend prediction pipeline, feature engineering workflow, and structured output for real-time decision support.
- **TempoType (Hackathon Project):** Built desktop application that dynamically adjusts music tempo based on typing speed and idle time. Implemented real-time keystroke tracking, adaptive speed logic, and user session handling within an Electron + React architecture.
- **AI Shelf Monitoring System:** Built CNN-based computer vision model to classify shelf states (Empty, Stocked, Almost Empty). Created custom dataset and trained models in Conda environment.

Related Experience

Intern – Bryant Public Schools, Bryant, AR (May 2022 – Aug 2022)

- Diagnosed and resolved hardware/software issues.
- Maintained professional relationships with staff and customers.
- Assisted in creating presentation materials.

Education

B.A. Computer Science, Minor in Finance – University of Arkansas, Fayetteville (Expected Dec 2026)

Other Experience

Student Athlete – Football (2022–Current), University of Arkansas

- Balanced Division I athletics with rigorous CS coursework.
- Demonstrated leadership, discipline, and teamwork.
