Portfolio: <https://braylonwatson.github.io/Portfolio-Profile/>

Professional Summary

Computer Science student and Division I student-athlete experienced in AI systems, object detection, database-backed applications, and full-stack development. Strong collaborator who is eager to learn.

Technical Skills

- **Languages:** C++, Java, Python, JavaScript, TypeScript, SQL, VHDL
- **Frameworks/Tools:** YOLOv8 (Ultralytics), Streamlit, Label Studio, PostgreSQL, Tkinter, Git, Linux, Conda, OpenAI API
- **Concepts:** Algorithms, Data Structures, CNNs, Object Detection, UDP Sockets, FSM Design, Datapath Architecture, Client-Server Systems

Projects

- **AI Shelf Monitoring System:** Built YOLOv8-based object detection model using Convolutional Neural Networks (CNNs) to classify shelf states (Empty, Stocked, Almost Empty). Created custom dataset in Label Studio and trained models in Conda environment.
- **Resume Analyzer SaaS:** Developed Streamlit web app with PDF parsing and OpenAI API integration for automated resume-job match scoring.

Related Experience

Intern – Bryant Public Schools, Bryant, AR (May 2022 – Aug 2022)

- Diagnosed and resolved hardware/software issues.
- Maintained professional relationships with staff and customers.
- Assisted in creating presentation materials.

Education

B.A. Computer Science, Minor in Finance – University of Arkansas, Fayetteville (Expected Dec 2026)

Other Experience

Student Athlete – Football (2022–Current), University of Arkansas

- Balanced Division I athletics with rigorous CS coursework.
- Demonstrated leadership, discipline, and teamwork.
